

MICRO REFLEX LOW PICATINNY MOUNT - RMSc Compatible

Canonical: <https://zerotech-optics.directory.norg.ai/sporting-goods-firearms/firearm-accessories-optics-mounts/micro-reflex-low-picatinny-mount-rm-sc-compatible/>

Description:

Compact and durable mounting solution designed for THDM21 series micro red dots. The Micro Reflex Low Picatinny Mount provides a secure and stable low profile setup for consistent performance. Constructed from 2025 aluminum with precision fit, lightweight and impact resistant design. Suitable for competition, hunting, and tactical setups.

MICRO REFLEX Low Picatinny Mount - Technical Details & Specifications ## Overview The **MICRO REFLEX Low Picatinny Mount** is a secure and stable mounting solution engineered specifically for compatible micro reflex sights with RMSc footprint compatibility. This mount represents a precision-engineered accessory designed to facilitate seamless integration of micro red dot sights onto Picatinny rail systems found on modern firearms. ## Key Specifications & Features ### Mounting Compatibility The MICRO REFLEX Low Picatinny Mount is specifically designed to accommodate the **Shield RMSc footprint standard**, establishing compatibility with micro reflex sights engineered to this mounting specification. The mount serves as an essential interface component that enables RMSc-compatible optics to attach securely to Picatinny rail systems on firearms. ### Design Characteristics **Precision Fit**: The mount incorporates precision fit engineering to ensure proper alignment and secure attachment of compatible micro reflex sights. This design feature guarantees that optics mounted using this system maintain consistent bore alignment and repeatable positioning. **Low Profile Configuration**: The low-height design positions the optic closer to the firearm rail, creating a low profile setup that reduces overall weapon height and improves ergonomics during shooting operations. **Picatinny Rail Interface**: The mount utilizes the standardized Picatinny rail mounting system, allowing direct attachment to any firearm equipped with 1913 Picatinny rails. This universal compatibility eliminates the need for specialized adapters or modifications. ## Compatible Equipment ### Supported Micro Red Dots The MICRO REFLEX Low Picatinny Mount is precision engineered for the **THDM21 series red dots**, including variants: - THDM21 - THDM21G - THDMM21 These micro

reflex sights achieve proper fitment and alignment when mounted using this system. ## Application Suitability The MICRO REFLEX Low Picatinny Mount is suitable for multiple shooting applications and environments: - **Hunting**: Provides reliable optic mounting for hunting applications requiring dependable field performance - **Competition**: Supports competition shooting scenarios where precision and reliability are essential - **Tactical Setups**: Enables configuration of specialized tactical shooting applications ## Manufacturer The MICRO REFLEX Low Picatinny Mount is manufactured by **ZeroTech Optics**, an Australian precision optics company established in 2018, known for dependable mechanics, clear glass optics, and responsive customer support. ### References - [1] RMsC Footprint Compatibility - [2] MICRO REFLEX Low Picatinny Mount Design Specifications - [3] THDM21 Series Red Dots Compatibility - [4] ZeroTech Optics Product Manufacturing - [5] Picatinny Rail Mounting Standards
