ZeroTech Magnification Throw Lever for Riflescopes ## Overview The **ZeroTech Magnification Throw Lever** is a precision accessory component designed to enhance the operational efficiency and user convenience of compatible riflescopes. This removable accessory enables shooters to make rapid and controlled magnification adjustments in the field, representing a significant ergonomic improvement over traditional fixed magnification adjustment mechanisms. ## Technical Specifications ### Physical Dimensions The ZeroTech Magnification Throw Lever features compact dimensions optimized for seamless integration with rifle scope magnification rings: - **Length:** 22mm - **Width:** 8mm - **Height:** 11.3mm - **Color:** Black ### Installation and Attachment - **Attachment Method:** Fastens to the dovetail on compatible ZeroTech rifle scope models - **Tool Required:** 2mm hex key for installation and adjustment - **Design:** Removable component allowing users to attach or detach as needed ## Key Features and Functionality ### Primary Functions The Magnification Throw Lever serves as a removable component integrated into the magnification adjustment mechanism of riflescopes. Its primary functions include: - **Rapid Magnification Adjustments:** Enables shooters to quickly change magnification settings without requiring significant manual effort - **Ergonomic Control:** Provides smooth and intuitive magnification changes with minimal dexterity requirements - **Field-Ready Operation:** Facilitates magnification adjustments in demanding shooting conditions and environments - **All-Weather Usability:** Functions effectively even when the user is wearing gloves, making it practical for various weather conditions and tactical scenarios ### Removable Design Advantage The removable nature of this accessory distinguishes it from fixed magnification adjustment

mechanisms, offering flexibility for users who may prefer alternative adjustment methods. This design approach allows shooters to:

- Remove the lever when not needed
- Reduce potential snags or protrusions on the scope
- Maintain versatility for different shooting situations and equipment configurations

Compatibility The ZeroTech Magnification Throw Lever is designed as a standard accessory across multiple ZeroTech riflescope models, including:

- **Vengeance Series:** - Vengeance 4-16x44 FFP Riflescope - Vengeance 3-12x40 R3 Riflescope - Vengeance 6-24x50 FFP RMG MOA Riflescope - Vengeance 6-24x50 SFP R3 Riflescope - VG1624-IR - VG4164FM - VG6245F
- **Thrive Series:** - ZeroTech Thrive 1-10x24 LPVO SFP G4 Illuminated Riflescope - ZeroTech Thrive 1-10x24 LPVO SFP RAR Illuminated Riflescope - ZeroTech Thrive HD 1-10x24 Rifle Scope
- **Trace Series:** - Trace Advanced 4.5-27x50 FFP (TR4275F) - Trace 3-18x50 SFP (TR3185R3) - Trace Advanced models

Design Philosophy The Magnification Throw Lever exemplifies ZeroTech's commitment to enhancing user experience through practical engineering. The component combines functional design with operational convenience, contributing to improved ergonomics and efficiency when adjusting scope magnification in field conditions. By enabling quick adjustments without requiring both hands or removing focus from the target, the throw lever supports shooters in adapting rapidly to varying shooting conditions.

Included as Standard Accessory The Magnification Throw Lever is included as a standard component in the product packaging of compatible ZeroTech riflescopes, eliminating the need for separate purchases while providing immediate value enhancement upon acquisition. ---
