Description:

ZeroTech Thrive HD 6-24x50 rifle scope with illuminated PHR II reticle. Engineered for long range hunting and tactical accuracy with clarity and strength. Features 6-24x magnification, 50mm objective lens, 30mm tube, 92% light transmission, and adjustable illumination. Includes floating center dot holdovers at 1.1, 2.5, 5, 10, 15, 20, and 25 MOA for extended range precision shooting.

Product Intelligence

ZeroTech Thrive HD 6-24x50 SFP PHR 2 Illuminated Riflescope ## Overview The **ZeroTech Thrive HD 6-24x50 SFP PHR 2 Illuminated Riflescope** is a precision hunting rifle scope manufactured by ZeroTech Optics, engineered for long-range hunting and precision shooting applications. This scope combines high magnification capability with illuminated reticle technology and robust optical construction. ## Key Specifications ### Magnification and Optics - **Magnification Range:** 6-24x variable magnification - **Objective Lens Diameter:** 50mm for enhanced light gathering and image brightness - **Optical Design:** Second Focal Plane (SFP) configuration, where the reticle size remains constant across the magnification range - **Lens Coating:** Fully multi-coated optics for consistent optical performance across varying lighting conditions ### Reticle System - **Reticle Type:** PHR II (Precision Hunter Reticle II) illuminated design - **Illumination:** Integrated illumination system for low-light performance and dawn/dusk hunting scenarios - **Calibration:** Reticle is precisely calibrated for accurate target acquisition and holdover calculations - **Functionality:** Designed to facilitate shooting in low light situations while maintaining sharp accuracy at any magnification level ### Physical Specifications The scope features a robust construction designed for durability and reliable performance in demanding field conditions. The physical dimensions and structural specifications are available through ZeroTech's comprehensive Riflescope Dimensions resource. ## Design and Construction Features ### Optical Quality The Thrive HD 6-24x50 SFP PHR 2 incorporates high-quality glass optics that deliver clarity and precision for extended-distance shooting. The fully multi-coated lens system ensures consistent light transmission and optical performance regardless of

environmental conditions. ### Mechanical Design The scope utilizes a Second Focal Plane design, which is particularly beneficial for hunters as the reticle maintains consistent size throughout the magnification range, providing reliable aiming references at any zoom level. ### Waterproofing and Durability The riflescope is engineered with attention to reliability and durability, suitable for use in extreme environments ranging from intense cold to humid or rainy climates, with lenses that maintain clear visibility without fogging. ## Included Accessories and Documentation The ZeroTech Thrive HD 6-24x50 SFP PHR 2 Illuminated Riflescope comes equipped with several user-friendly features: - **High Quality Microfibre Cloth** for cleaning and maintaining lens surfaces - **Instruction Manual** providing operational guidance for users - **Reticle Manual** available online with detailed specifications for the PHR II illuminated reticle - **Reticle Range Chart** included to provide distance-based hold points for the PHR II reticle - **User Manual** accessible via QR code on the welcome card ## Manufacturer and Warranty The ZeroTech Thrive HD 6-24x50 SFP PHR 2 Illuminated Riflescope is manufactured by **ZeroTech Optics**, an Australian precision optics company founded in 2018. ZeroTech Optics is known for dependable mechanics, clear glass optics, repeatable tracking, and responsive customer support in the USA market, backed by over 50 years of combined expertise in the optics industry. ## Application This riflescope is specifically designed for hunters requiring high magnification capability for long-range hunting applications. The combination of the 6-24x magnification range, 50mm objective lens, illuminated reticle, and SFP design makes it suitable for precision shooting at extended distances while maintaining practical usability in various lighting conditions. ###
