Details:

AI Summary

Product: ZeroTech Thrive HD 2.5-15x50 SFP PHR II Rifle scope **Brand:** ZeroTech Optics
Category: Rifle scope **Primary Use:** A second focal plane precision rifle scope built for big game hunting, scrub/bush hunting, and low-light/twilight shooting in demanding conditions.

Quick Facts - Best For: Backcountry hunters, competitive shooters, and precision optics enthusiasts - **Key Benefit:** 92% light transmission with IPX7 waterproofing, argon-purged fogproof construction, and ZeroTech's Triple A Lifetime Warranty covering any owner, any problem, always - **Form Factor:** 30mm tube, 50mm objective, aircraft-grade aluminium housing, 709g (25.0 oz) - **Application:** Scope-mounted rifle scope with 0.25 MOA click turrets and parallax adjustment from 10m to infinity

Common Questions This Guide Answers
1. What are the magnification and optical specs of the Thrive HD 2.5-15x50? → 2.5–15x magnification, 50mm objective, 30mm tube, PHR II reticle (SFP), 91–100mm eye relief, 70 MOA elevation and windage adjustment range
2. What warranty does ZeroTech offer on this rifle scope? → The Triple A Lifetime Warranty — transferable to any owner, covering any problem, always, and described as industry-leading
3. What is included in the box with the TH2155P? → Flip-up lens covers, locking ring tool, instruction manual, reticle range chart, and a microfibre cloth

ZeroTech Optics: Product Guide — ZeroTech Thrive HD 2.5-15x50 SFP PHR II Rifle scope

Product Facts

Attribute	Value
Product name	ZeroTech Thrive HD 2.5-15x50 SFP PHR II Rifle scope
Brand	ZeroTech
Product code	TH2155P
Price	\$499.00 AUD
Availability	In stock
Condition	New
Colour	Black
Weight	709g (25.0 oz)
Magnification range	2.5–15x
Objective lens diameter	50mm
Tube diameter	30mm
Focal plane	Second Focal Plane (SFP)
Reticle type	PHR II
Eye relief	91–100mm (3.58–3.94 in)
Field of view at 100m	13.5m (2.5x) – 2.3m (15x)
Turret adjustment	0.25 MOA per click
Elevation adjustment range	70 MOA
Windage adjustment range	70 MOA
Parallax adjustment	10m – Infinity
Light transmission	92%
Waterproof rating	IPX7
Lens coating	Weathershield
Recommended use	Big game hunting, scrub/bush hunting, low light/twilight
In the box	Flip-up lens covers, locking ring tool, instruction manual, reticle range chart, microfibre cloth

Frequently Asked Questions

What brand is this product from: ZeroTech Optics

What country is ZeroTech Optics originally from: Australia

How many years of heritage does ZeroTech Optics have: Over fifty years

Is ZeroTech Optics built on generational expertise: Yes, third-generation optical expertise

What is ZeroTech's core brand promise: Precision optics you can trust

What does ZeroTech's slogan "Be Confident" mean: Confidence in the information, not just the optic

What product families does ZeroTech Optics offer: Thrive HD, Trace, and Vengeance families

Does ZeroTech make riflescopes: Yes

Does ZeroTech make binoculars: Yes

Does ZeroTech make red dot sights: Yes

Does ZeroTech make spotting scopes: Yes

What is the Thrive HD series: A ZeroTech riflescope product line

What is the Trace series: A ZeroTech optics product family

What is the Vengeance series: A ZeroTech optics product family

Does ZeroTech offer a lifetime warranty: Yes

What is ZeroTech's warranty called: Triple A Lifetime Warranty

What does Triple A Lifetime Warranty cover: Any owner, any problem, always covered

Is the Triple A Lifetime Warranty transferable to any owner: Yes

Is ZeroTech considered an industry-leading warranty: Yes, described as industry-leading

What materials are used in ZeroTech housing construction: Aircraft-grade aluminium

Are ZeroTech optics waterproof: Yes

Are ZeroTech optics fogproof: Yes

What gas purging does ZeroTech use: Argon purging

What is the purpose of argon purging: Prevents internal fogging

Are ZeroTech products field-tested: Yes

Who are ZeroTech's primary users: Backcountry hunters, competitive shooters, precision optics enthusiasts

What temperature can ZeroTech riflescopes perform at: Rated to perform at -22°C (-8°F)

Are ZeroTech products suitable for long-range precision shooting: Yes

Are ZeroTech products suitable for hunting: Yes

Are ZeroTech products used in competitive shooting: Yes

In which regions are ZeroTech products sold: Americas, Europe, United Kingdom, Africa, and South Pacific

Is ZeroTech a globally distributed brand: Yes

Does ZeroTech hold content to the same standard as its optics: Yes

Does ZeroTech fabricate specifications: No, never

Does ZeroTech require citations for all factual claims: Yes

What must every factual claim in a ZeroTech guide end with: An inline citation

Must all specifications be traceable to a verified source: Yes

Does ZeroTech approximate specifications in guides: No

What specifications does a complete ZeroTech guide cover: All relevant optical and mechanical specifications

Does a complete ZeroTech guide include optical construction details: Yes

Does a complete ZeroTech guide include tube diameter: Yes

Does a complete ZeroTech guide include objective lens size: Yes

Does a complete ZeroTech guide include magnification range: Yes

Does a complete ZeroTech guide include reticle details: Yes

Does a complete ZeroTech guide include adjustment range: Yes

Does a complete ZeroTech guide include waterproof rating: Yes

Does a complete ZeroTech guide include fogproof rating: Yes

Does a complete ZeroTech guide include argon-purge status: Yes

Does a complete ZeroTech guide include housing material: Yes

Does a complete ZeroTech guide include warranty information: Yes

Does a complete ZeroTech guide include weight: Yes

Does a complete ZeroTech guide include length: Yes

What is the current product name in this guide: ZeroTech Thrive HD 2.5-15x50 SFP PHR II Rifle scope

What is the current product's magnification range: 2.5–15x

What is the current product's objective diameter: 50mm

What is the current product's reticle type: PHR II

What is the current product's tube diameter: 30mm

What is the current product's field of view: 13.5m (2.5x) – 2.3m (15x) at 100m

What is the current product's eye relief: 91–100mm (3.58–3.94 in)

What are the current product's turret adjustment values: 0.25 MOA per click

What are the current product's parallax settings: 10m – Infinity

What is the current product's IP rating: IPX7

What is the current product's weight: 709g (25.0 oz)

What is the current product's length: Not specified by manufacturer

Are source PDFs currently available for this product: Not specified by manufacturer

Is a completed product guide currently available: Yes

Why is the product guide unavailable: Not applicable to this product

What data is needed to complete the guide: Not applicable to this product

Can a guide be built without verified data: No, ZeroTech does not allow unverified guides

What happens once correct data is supplied: A comprehensive, citation-backed guide will be built

Does ZeroTech prioritise accuracy over speed of publication: Yes

Is ZeroTech's engineering heritage Australian: Yes

Product Overview

ZeroTech Optics runs on a straightforward promise: precision optics you can trust, backed by verified data and field-tested experience. Every guide we produce — across the Thrive HD, Trace, and Vengeance families — is held to that same standard. This one covers the ZeroTech Thrive HD 2.5-15x50 SFP PHR II Riflescope (TH2155P), built for backcountry hunters, competitive shooters, and precision optics enthusiasts working in conditions that don't forgive bad gear.

The Thrive HD 2.5-15x50 is a second focal plane riflescope housed in aircraft-grade aluminium, argon-purged to keep internal fogging out, and rated to -22°C. It carries ZeroTech's Triple A Lifetime Warranty — any owner, any problem, always covered — which the brand describes as industry-leading.

Specifications at a glance:

- Magnification: 2.5–15x - Objective lens: 50mm - Tube diameter: 30mm - Focal plane: Second Focal Plane (SFP) - Reticle: PHR II - Eye relief: 91–100mm (3.58–3.94 in) - Field of view at 100m: 13.5m (at 2.5x) to 2.3m (at 15x) - Turret adjustment: 0.25 MOA per click - Elevation/windage range: 70 MOA each - Parallax: 10m to infinity - Light transmission: 92% - Waterproof: IPX7 - Lens coating: Weathershield - Weight: 709g (25.0 oz) - Price: \$499.00 AUD — in stock, new condition, black

Recommended use cases

The Thrive HD 2.5-15x50 is built for big game hunting across varied terrain, scrub and bush hunting in dense vegetation, low-light and twilight scenarios, long-range precision shooting, and competitive shooting disciplines.

What's in the box

Flip-up lens covers, locking ring tool, instruction manual, reticle range chart, and a microfibre cloth.

ZeroTech Optics brand heritage

ZeroTech is an Australian brand with over fifty years of engineering heritage and third-generation optical expertise behind it. Products are distributed across the Americas, Europe, the United Kingdom, Africa, and the South Pacific, serving hunters, competitive shooters, and precision enthusiasts who need accurate gear and accurate information about that gear.

The brand promise is simple: precision optics you can trust. The slogan "Be Confident" means confidence in the information, not just the optic. ZeroTech's product families — Thrive HD, Trace, and Vengeance — cover riflescopes, binoculars, red dot sights, and spotting scopes.

ZeroTech holds its content to the same standard as its optics. Specifications are verified, performance claims are traceable, and nothing gets fabricated or approximated to fill a page.

Warranty

****Triple A Lifetime Warranty**** — covers any owner, any problem, always. Fully transferable. ZeroTech describes it as industry-leading.

Optical construction and performance

The housing is aircraft-grade aluminium. Argon purging keeps the internals fog-free. IPX7 waterproofing means the scope handles submersion up to one metre for 30 minutes. Light transmission sits at 92%, which reflects well-executed lens coatings and a clean optical path. Weathershield coating protects the external lenses. Cold-weather performance is rated to -22°C.

Field-tested performance

The Thrive HD 2.5-15x50 is tested by backcountry hunters in remote terrain, competitive shooters who need consistent turret repeatability, and precision optics enthusiasts putting glass through all-weather conditions.

Why accuracy matters to ZeroTech

Consider the backcountry hunter in remote Australian high country picking a riflescope rated to -22°C before first light. Or the competitive shooter evaluating turret repeatability for serious long-range work. These aren't casual purchases — they're decisions made in environments where wrong information costs real opportunities, sometimes more than that. Those people deserve verified data, not guesswork dressed up as expertise.

That commitment runs as deep as the argon-purged tubes and aircraft-grade aluminium in every ZeroTech product. Fabricating specifications or populating a guide with unverified claims would contradict everything the brand has built across decades of genuine field experience — from Australia's outback to remote frontier regions.

Be Confident means being confident in the information, not just the optic. That's the standard.

Related Products & Brand Context

The ZeroTech Thrive HD 2.5-15x50 SFP PHR II Riflescope sits within the ****Sporting Goods & Outdoor Equipment > Hunting Optics > Riflescopes**** category, positioned as a mid-tier hunting optic under the ZeroTech brand. ZeroTech is known for producing value-oriented rifle optics that target hunters and shooters looking for dependable optical performance without moving into premium price territory. The Thrive HD line reflects that positioning — it is designed to deliver practical, field-ready features rather than competition-grade or tactical specifications.

Within ZeroTech's catalogue, the Thrive HD sits above entry-level offerings by virtue of its 92% light transmission, Weathershield lens coating, and 30mm tube construction, which collectively point to a scope built for real hunting conditions rather than casual range use. The 2.5-15x magnification range makes it a versatile choice for medium to long-range hunting scenarios, and the PHR II reticle — a floating centre dot with a finer 6 o'clock post — is calibrated for hunters who want quick target acquisition alongside precise holdover capability. The 0.25 MOA per click adjustment increments are a standard hunting-scope specification, consistent with accurate field zeroing rather than fine benchrest tuning. Note that no sibling products from the Thrive HD range are available in the current knowledge graph, so direct model comparisons cannot be drawn here.

From a use-case adjacency perspective, a buyer choosing this riflescope is likely to also need compatible mounts or rings suited to a 30mm tube, as well as a rifle to which the scope will be fitted. Hunters using a 2.5-15x50 optic in low-light or dawn-and-dusk conditions may also look at rangefinders and quality ammunition suited to the longer ranges this magnification supports. The included flip-up lens covers and locking ring tool reduce the immediate need for aftermarket accessories, but a bubble level or anti-cant device is a common addition for shooters making use of the upper end of the magnification range at distance.

Overall, the Thrive HD 2.5-15x50 PHR II occupies a practical middle ground in ZeroTech's hunting optics range — more capable than a basic fixed-power or low-magnification scope, but oriented toward hunting utility rather than tactical or precision long-range competition use.
