

ZeroTech Thrive HD Variable Prism 1-4x24 RAP-R Illuminated Scope

Canonical: <https://zerotech-optics.directory.norg.ai/sporting-outdoor-equipment/rifle-scopes-optics/zerotech-thrive-hd-variable-prism-1-4x24-rap-r-illuminated-scope/>

Description:

The Thrive HD 1-4x24 Variable Prism RAP-R Illuminated delivers compact versatility with a rugged prism design built for hunting and dynamic shooting, providing dependable targeting and clear visuals from close quarters to mid-range engagements. Features include Mini ACOG Footprint Compatibility, Variable 1-4x Magnification Range, RAP-R Illuminated Etched Reticle, Red and Green Illumination Control, and 0.5 MOA Per Click Adjustments. The etched reticle remains visible even if the battery fails, ensuring reliability in critical situations. Ideal for shooters with astigmatism due to crisp, detailed aiming point. Compact prism design with wide field of view (131.3 ft at 1x magnification) enhances situational awareness for tactical and defensive applications.

Product Intelligence

ZeroTech Thrive HD Variable Prism 1-4x24 RAP-R Illuminated Scope ## Overview The **ZeroTech Thrive HD Variable Prism 1-4x24 – RAP-R Illuminated** is a versatile variable prism scope engineered for hunting, tactical use, and dynamic shooting applications. This compact optical instrument combines variable magnification with advanced prism scope technology, delivering exceptional performance across close-quarters to mid-range engagements. ## Key Technical Specifications ### Magnification and Optical Properties - **Magnification Range**: 1-4x variable zoom, providing adaptability from close-quarters engagements to mid-range targets - **Objective Lens Diameter**: 24mm, optimizing light gathering capability and optical performance while maintaining a compact profile - **Focal Plane Design**: Features a prism-based optical system designed for rapid target acquisition and modern shooting applications ### Reticle System - **Reticle Type**: RAP-R etched reticle with illumination capability - **Illumination Options**: Red and green illumination with adjustable brightness controls -

Reticle Calibration: Etched glass design providing reliable aiming references without requiring constant battery power for the mechanical reticle

Eye Relief and Viewing Comfort - **Eye Relief**: 3 inches (approximately 76mm), ensuring comfortable and safe viewing positions for extended shooting sessions - **Field of View**: 131.3 feet at 1x magnification for enhanced situational awareness and tactical awareness during use - **Extended Field of View Range**: 43.7 meters to 10.4 meters at 100 meters, providing wide visual coverage across the magnification range

Adjustment Capabilities - **Elevation Adjustment**: 0.5 MOA per click adjustments for precise vertical point-of-aim correction - **Windage Adjustment**: Corresponding horizontal adjustment capability for crosswind compensation - **Internal Adjustment System**: Mechanical turret-based adjustments for reliable, repeatable zeroing

Illumination and Power System - **Battery Type**: CR2032 battery (included with scope) - **Illumination Control**: Multiple brightness settings with separate red and green illumination options - **Power Supply**: Side-loading battery design for convenient access and replacement

Design and Construction Features

Physical Characteristics - **Weight**: 19.22-19.25 ounces, providing a lightweight solution suitable for various firearm platforms - **Mounting**: Mini ACOG footprint compatibility with integrated Picatinny rail mount for secure firearm installation - **Compact Design**: Engineered for hunters and tactical shooters requiring a rugged, space-efficient optical solution

Optical Coatings and Durability - **Lens Coating**: FMC (Fully Multi-Coated) lens coating to enhance light transmission, reduce internal reflections, and improve overall image quality - **Waterproof Rating**: IPX7 waterproof rating ensuring durability and reliable functionality in wet, humid, and challenging environmental conditions - **Rugged Construction**: Built to withstand demanding shooting applications including self-defense, home protection, dynamic shooting competitions, hunting, and recreational shooting

Applications and Suitability The Thrive HD Variable Prism 1-4x24 is specifically designed for:

- Hunting**: Versatile magnification for various game at different distances
- Tactical Applications**: Close-quarters to mid-range engagement capability with rapid target acquisition
- Home Defense**: Compact design suitable for home protection scenarios
- Dynamic Shooting Competitions**: Reliable performance in competitive shooting environments
- Recreational Shooting**: Adaptable magnification range for general range shooting and sport applications

Included Accessories and Documentation - CR2032 battery for immediate illumination functionality - Reticle Manual containing technical specifications for the RAP-R reticle system - Product Manual providing comprehensive instructions for installation, operation, and maintenance
