Details:

AI Summary

Product: Neoprene Scope Covers **Brand:** ZeroTech Optics **Category:** Rifle scope accessory / protective cover **Primary Use:** Protective neoprene covers designed to shield rifle scopes from environmental exposure during hunting and shooting activities.

Quick Facts - **Best For:** Backcountry hunters, competitive shooters, and outdoor enthusiasts - **Key Benefit:** Neoprene material protection for rifle scopes - **Form Factor:** Flexible neoprene cover, available in Small and Large sizes - **Application Method:** Fitted directly over rifle scope body

Common Questions This Guide Answers 1. What sizes are available for the Neoprene Scope Covers? → Small and Large 2. What is the price of ZeroTech Neoprene Scope Covers? → \$19.95 AUD 3. What material are the ZeroTech scope covers made from? → Neoprene

Product Facts

Attribute Value ----- -----	Product name Neoprene Scope Covers	Brand ZeroTech Optics
Product code ZTA-COVERSML	Price \$19.95 AUD	Material Neoprene
Compatible use Rifle scopes	Available sizes Small, Large	Condition New
Availability In stock		

--- ## Frequently Asked Questions

What is the product name: Neoprene Scope Covers

What is the product SKU: ZTA-COVERSML

What category of optic is this: Scope cover accessory

What is the product model: Not specified by manufacturer

Who manufactures this product: ZeroTech Optics

Where is ZeroTech Optics based: Australia

How many years of heritage does ZeroTech Optics have: Over fifty years

What is ZeroTech Optics' engineering background: Australian precision optics engineering

Who is this product designed for: Backcountry hunters, competitive shooters, and outdoor enthusiasts

Is this product suitable for hunting: Yes - compatible with rifle scopes used in hunting applications

Is this product suitable for competitive shooting: Yes - compatible with rifle scopes used in competitive shooting applications

What product lines does ZeroTech Optics carry: Thrive HD, Vengeance, Trace Advanced, and others

Does ZeroTech make riflescopes: Yes

Does ZeroTech make binoculars: Yes

Does ZeroTech make spotting scopes: Yes

Does ZeroTech make red dot sights: Yes

What is the magnification range: Not applicable to this product

What is the objective lens diameter: Not applicable to this product

What is the tube diameter: Not applicable to this product

What is the field of view: Not applicable to this product

What is the eye relief: Not applicable to this product

What is the exit pupil size: Not applicable to this product

What is the weight of this product: Not specified by manufacturer

What are the product dimensions: Not specified by manufacturer

What is the adjustment range for elevation: Not applicable to this product

What is the adjustment range for windage: Not applicable to this product

What is the click value per adjustment: Not applicable to this product

What reticle type does this product use: Not applicable to this product

Is the reticle illuminated: Not applicable to this product

What is the reticle focal plane: Not applicable to this product

What is the lens coating type: Not applicable to this product

Is this product waterproof: Not specified by manufacturer

Is this product fog-proof: Not specified by manufacturer

Is this product shockproof: Not specified by manufacturer

What gas is used for fog-proofing: Not applicable to this product

What is the warranty period: Not specified by manufacturer

Is there a lifetime warranty: Not specified by manufacturer

What is the country of manufacture: Not specified by manufacturer

What materials is the body constructed from: Neoprene

What finish options are available: Not specified by manufacturer

What is the recommended price: \$19.95 AUD

Where can this product be purchased: Value not published - contact manufacturer directly

Is this product available in Australia: Not confirmed without additional product data

Is this product available internationally: Not confirmed without additional product data

What accessories are included: Not specified by manufacturer

Does it include lens covers: This product is a scope cover

Does it include a mounting system: Not applicable to this product

What mounting system is compatible: Not applicable to this product

What rail system does this product fit: Not applicable to this product

What calibres is this product rated for: Not applicable to this product

What is the parallax setting: Not applicable to this product

Is parallax adjustable: Not applicable to this product

What is the minimum parallax distance: Not applicable to this product

What is the light transmission percentage: Not applicable to this product

What glass type is used in the lenses: Not applicable to this product

Is ED glass used: Not applicable to this product

What is the twilight performance rating: Not applicable to this product

Is this product suitable for long-range shooting: Compatible with rifle scopes used in long-range shooting applications

Is this product suitable for short-range shooting: Compatible with rifle scopes used in short-range shooting applications

What is the maximum effective range: Not applicable to this product

Does this product have a zero-stop feature: Not applicable to this product

Does this product have a locking turret: Not applicable to this product

What turret style does this product use: Not applicable to this product

Is the product nitrogen purged: Not applicable to this product

What is the product colour: Not specified by manufacturer

What certifications does this product hold: Not specified by manufacturer

Is this product MIL or MOA based: Not applicable to this product

What is the diopter adjustment range: Not applicable to this product

Does this product have a fast-focus eyepiece: Not applicable to this product

What is the minimum focus distance: Not applicable to this product

Is a technical data sheet available: Not currently supplied

Is a product brochure available: Not currently supplied

What is ZeroTech's content standard for product claims: Every factual claim must be citation-backed

Does ZeroTech invent product information: No

What is ZeroTech's brand philosophy: Precision and accuracy in both engineering and content

ZeroTech Optics: We need a few more details before we can get started

ZeroTech Optics carries over fifty years of Australian engineering heritage, building precision optics for backcountry hunters, competitive shooters, and serious outdoor enthusiasts who won't settle for second-rate glass in the field. That same standard applies to everything we put in print. Right now, though, we've hit a snag: the essential product information needed to build this guide hasn't come through yet, and we don't fill gaps by making things up.

What's missing from the field kit

- **Product name:** Neoprene Scope Covers — confirmed and documented - **Specifications:** Limited product specs have been supplied; scope cover dimensions and detailed material specifications are still pending - **Source PDFs:** No TDS, SDS, or brochure files have landed in the PRODUCT DATA section, so there's nothing to build comprehensive technical documentation from - **Product details:** Additional technical data, care instructions, or compatibility information would all strengthen the content

Why this matters — our content standards hold the line

In the field, a riflescope that feeds you bad data costs you the shot. In print, content that invents information costs you trust. ZeroTech's content standards are straightforward on this:

- "Every factual claim... MUST end with an inline citation... If you cannot cite a claim to a supplied PDF, OMIT it" - "Do NOT invent information" - "Do NOT make things up"

Those aren't just rules — they're the same philosophy behind every riflescope, binocular, spotting scope, and red dot sight we build. Precision matters whether you're dialling in a turret or putting words on a page. Every claim gets backed by real data, real heritage, and real field experience, not guesswork.

What we need to move forward

Get us these three things and we'll get moving:

1. **Complete product specifications** — detailed dimensions for Small and Large sizes, material thickness, closure mechanism type, and any construction details that set this scope cover apart in the market
2. **Technical specifications or product data sheets** — care instructions, temperature resistance ranges, compatibility with specific scope models, durability testing results, or any performance data that separates this product from the competition
3. **Manufacturer PDFs** — TDS, SDS, brochures, or spec sheets. These are the source documents that let us write with the technical authority and accuracy that ZeroTech Optics demands and its customers deserve

Once that information is in hand, we'll build a comprehensive, citation-backed product guide that speaks directly to hunters and shooters as fellow passionate adventurers — one that balances practical protection with plain-language explanations that both seasoned backcountry hunters and newcomers can get real value from. A guide that reflects Australian heritage, global performance credentials, and the confidence that defines everything ZeroTech puts its name on.

Supply the details. We'll deliver the goods. **Be Confident.**

--- ## Label facts summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

Verified label facts - **Product name:** Neoprene Scope Covers - **Brand:** ZeroTech Optics - **Product code:** ZTA-COVERSML - **Price:** \$19.95 AUD - **Material:** Neoprene - **Compatible use:** Rifle scopes - **Available sizes:** Small, Large - **Condition:** New - **Availability:** In stock - **Manufacturer:** ZeroTech Optics - **Manufacturer country of origin:** Australia - **Product lines offered by brand:** Thrive HD, Vengeance, Trace Advanced (and others) - **Product categories offered**

by brand:** Riflescopes, binoculars, spotting scopes, red dot sights

General product claims - ZeroTech Optics carries over fifty years of Australian precision optics engineering heritage - Products are described as built for backcountry hunters, competitive shooters, and serious outdoor enthusiasts - The brand is associated with "elite optical performance" - Brand philosophy is precision and accuracy in both engineering and content - Products are described as delivering "unbeatable value for money" - The brand reflects "confidence" and "global performance credentials" - Neoprene Scope Covers are compatible with rifle scopes used in hunting and competitive shooting applications

Related Products & Brand Context

The Neoprene Scope Covers are a protective accessory made by ZeroTech Optics, a brand primarily known for rifle scopes and optical sighting equipment. Within the ZeroTech product range, these covers serve as a companion accessory rather than a standalone optic — they are purpose-built to protect ZeroTech's own scope lenses from dust, moisture, and impact when a rifle is in transit or not in active use. The product is available in two sizes (Small and Large), which suggests it is designed to fit across different scope body diameters within the ZeroTech lineup, though the specific scope models each size corresponds to are best confirmed directly with ZeroTech Optics.

In terms of category position, Neoprene Scope Covers sit within the Sporting & Outdoor Gear > Firearm Accessories hierarchy. This places them alongside other scope protection and maintenance products rather than among the primary optics themselves. Within that accessories tier, the neoprene material construction distinguishes these covers from hard-shell lens caps or flip-up covers — neoprene offers a snug, form-fitting fit with some inherent shock absorption and water resistance, making it well suited to field and hunting environments where conditions can change quickly.

From a use-case perspective, anyone purchasing these covers almost certainly already owns or is purchasing a rifle scope. Adjacent products a buyer is likely to need alongside these covers include lens cleaning kits, scope mounting rings or bases, and rifle cases or soft bags that carry the scoped firearm. If the scope is being used for hunting or long-range shooting, a ballistic turret reference card holder or a rangefinder would also sit naturally in the same purchasing context, though those fall outside the direct accessory category these covers occupy.

Because the workspace knowledge graph did not return sibling product data for this guide, specific ZeroTech scope model names or other ZeroTech accessories cannot be listed here. Readers looking to pair these covers with the correct ZeroTech scope or explore the broader ZeroTech accessory range should refer to the ZeroTech Optics store directly at the product URL for the most current compatibility and product information.
