

ZeroTech Vengeance 4-16x44 FFP RMG Riflescope

Canonical: <https://zerotech-optics.directory.norg.ai/sporting-outdoor-gear/rifle-scopes-optics/zerotech-vengeance-4-16x44-ffp-rmg-riflescope/>

Description:

The ZeroTech Vengeance 4-16x44 FFP Riflescope is designed for long range shooters who require a lighter and more agile optic. The 44mm objective lens combined with a 30mm one piece maintube supports strong light transmission and mounting rigidity. The RMG FFP reticle is available in both MRAD and MOA configurations, allowing precise targeting without the need to constantly dial adjustments. This riflescope offers versatile performance across a range of shooting conditions, making it suitable for applications from hunting to competitive shooting. Features: Reticle scales with magnification, ZeroStop turrets for reliable return, 23 MRAD / 80 MOA elevation adjustment, 20 MRAD / 68 MOA windage adjustment, Compact and lightweight handling.

Product Intelligence

ZeroTech Vengeance 4-16x44 FFP RMG Riflescope ## Overview The **ZeroTech Vengeance 4-16x44 FFP RMG Riflescope** is a versatile mid-range hunting optic manufactured by ZeroTech Optics. This scope is designed to combine precision, value, and clarity, making it an excellent choice for hunters and shooters requiring reliable long-range performance. ## Technical Specifications ### Magnification and Optics The riflescope features a **4-16x magnification range**, providing variable zoom capability from 4x to 16x power. This magnification range enables shooters to adapt to different engagement distances and shooting conditions, making it suitable for both standard and long-range shooting scenarios. The scope is equipped with a **44mm objective lens**, which serves as the primary light-gathering component. This objective lens diameter directly determines the light-gathering capability, brightness, and overall optical performance of the riflescope, particularly in varying lighting conditions. ### Optical Design The **FFP (First Focal Plane) design** is a fundamental characteristic

of this riflescope. In First Focal Plane configuration, the reticle is positioned in the first focal plane of the optical system, meaning the reticle size scales proportionally with magnification changes. This design provides consistent reticle functionality across all magnification levels. ### Reticle System The scope is equipped with the **RMG reticle**, which provides precise aiming and targeting capability. The reticle design is engineered to assist in accurate shot placement and ranging procedures. ### Optical Performance The riflescope features **fully multi-coated lenses** that provide clear images and strong brightness across varying lighting conditions. These optical coatings enhance light transmission and ensure consistent optical performance, contributing to crisp image clarity and contrast. ### Optical Construction The riflescope utilizes a **30mm one-piece main tube**, which provides structural rigidity and ensures proper alignment and functionality. This robust construction is designed to withstand demanding field use and recoil forces associated with firearm operation, maintaining optical integrity in challenging conditions. ## Color and Finish The ZeroTech Vengeance 4-16x44 FFP RMG Riflescope is available in **black** finish, providing a professional appearance suitable for hunting and tactical applications. ## Primary Applications This riflescope is designed for **hunting and range shooting** applications, offering versatile performance suitable for various hunting scenarios and precision shooting activities across different distances. ## Manufacturer The ZeroTech Vengeance 4-16x44 FFP RMG Riflescope is **manufactured by ZeroTech Optics**, a producer of quality optical products for shooters and hunters. --- *Note: The provided context does not contain complete detailed specifications such as eye relief, weight, parallax adjustment, turret specifications, or field of view measurements for this specific model variant. For comprehensive specifications, please consult the product manual or contact ZeroTech Optics directly.*
