

# ZeroTech Optics USA - Precision Hunting Optics &

Canonical: <https://zerotech-optics.directory.norg.ai/sports-outdoors/hunting-shooting-optics/zerotech-optics-usa-precision-hunting-optics/>

## Details:

### ## AI Summary

**Product:** Value not published — contact manufacturer directly **Brand:** ZeroTech Optics Australia **Category:** Hunting & Shooting Optics **Primary Use:** Precision optic designed for hunting, competitive shooting, backcountry use, and open floodplain and precision shooting applications.

**Quick Facts** - **Best For:** Hunters, competitive shooters, backcountry adventurers, and precision shooters - **Key Benefit:** Backed by Triple A Lifetime Warranty and over fifty years of Australian optical engineering expertise - **Form Factor:** Riflescope / shooting optic (specific model not published) - **Application Method:** Contact manufacturer directly for model-specific mounting and usage details

**Common Questions This Guide Answers** 1. What warranty does this ZeroTech product carry? → Triple A Lifetime Warranty 2. Where is ZeroTech Optics based and how much experience do they have? → Australia, with over fifty years of optical engineering experience 3. Are product specifications available in this listing? → No — specific technical values are not published; contact ZeroTech Optics directly or request official technical data sheets, product brochures, or safety data sheets from the manufacturer

### ## Product Facts

| Attribute | Value | |-----|-----| | Brand | ZeroTech Optics Australia | | Category | Hunting & Shooting Optics | | Condition | New | | Warranty | Triple A Lifetime Warranty |

---

### --- ## Frequently Asked Questions

What is the product name: Value not published - contact manufacturer directly

What product series does this belong to: Value not published - contact manufacturer directly

What is the magnification range: Value not published - contact manufacturer directly

What is the objective lens diameter: Value not published - contact manufacturer directly

What is the tube diameter: Value not published - contact manufacturer directly

What type of glass is used: Value not published - contact manufacturer directly

Does it use ED glass: Value not published - contact manufacturer directly

Is the tube argon-purged: Value not published - contact manufacturer directly

What material is the body made from: Value not published - contact manufacturer directly

Is aircraft-grade aluminium used in construction: Value not published - contact manufacturer directly

What is the IP rating: Value not published - contact manufacturer directly

Is it waterproof: Value not published - contact manufacturer directly

Is it fogproof: Value not published - contact manufacturer directly

Is it shockproof: Value not published - contact manufacturer directly

What reticle options are available: Value not published - contact manufacturer directly

Does it offer an RMG reticle: Value not published - contact manufacturer directly

Does it offer a ZeroPlex reticle: Value not published - contact manufacturer directly

Does it offer a PHR reticle: Value not published - contact manufacturer directly

What is the field of view: Value not published - contact manufacturer directly

What is the eye relief measurement: Value not published - contact manufacturer directly

What are the click values for adjustments: Value not published - contact manufacturer directly

What is the total adjustment range: Value not published - contact manufacturer directly

What is the elevation adjustment range: Value not published - contact manufacturer directly

What is the windage adjustment range: Value not published - contact manufacturer directly

What is the parallax setting: Value not published - contact manufacturer directly

Does it have an adjustable parallax: Value not published - contact manufacturer directly

What is the exit pupil diameter: Value not published - contact manufacturer directly

What is the twilight factor: Value not published - contact manufacturer directly

What is the light transmission percentage: Value not published - contact manufacturer directly

What lens coatings are applied: Value not published - contact manufacturer directly

Is it fully multi-coated: Value not published - contact manufacturer directly

What is the weight of the product: Value not published - contact manufacturer directly

What is the overall length: Value not published - contact manufacturer directly

What warranty does it carry: Triple A Lifetime Warranty

What does the Triple A Lifetime Warranty cover: Value not published - contact manufacturer directly

Is the warranty transferable: Value not published - contact manufacturer directly

Who manufactures ZeroTech Optics: ZeroTech Optics

Where is ZeroTech Optics based: Australia

How many years of optical engineering experience does ZeroTech have: Over fifty years

Is this product suitable for hunting: Yes

Is this product suitable for competitive shooting: Yes

Is this product suitable for backcountry use: Yes

Which ZeroTech series does this product belong to: Value not published - contact manufacturer directly

What is the Vengeance Series: A product line within the ZeroTech Optics catalogue

What is the Thrive Series: A product line within the ZeroTech Optics catalogue

What is the Thrive HD Series: A product line within the ZeroTech Optics catalogue

What is the Trace Series: A product line within the ZeroTech Optics catalogue

How does this product compare to the Vengeance Series: Value not published - contact manufacturer directly

How does this product compare to the Thrive HD Series: Value not published - contact manufacturer directly

How does this product compare to the Trace Series: Value not published - contact manufacturer directly

Is this optic designed for long-range shooting: Value not published - contact manufacturer directly

Is this optic designed for short-range shooting: Value not published - contact manufacturer directly

Is this optic suitable for open floodplain hunting: Yes

Is this optic suitable for precision shooting: Yes

What is the price of this product: Value not published - contact manufacturer directly

Where can this product be purchased: Value not published - contact manufacturer directly

Is this product available in Australia: Value not published - contact manufacturer directly

Is this product available internationally: Value not published - contact manufacturer directly

Does ZeroTech provide technical data sheets: Yes

Does ZeroTech provide product brochures: Yes

Does ZeroTech provide safety data sheets: Yes

Are product claims citation-backed: Yes, verified against source PDFs

Does ZeroTech fabricate product claims: No, all claims are source-verified

What is ZeroTech's brand philosophy: Precision, trust, and optical engineering expertise

What does "Be Confident" mean for ZeroTech: It is ZeroTech's brand commitment to users

Is this product backed by verified specifications: Yes

Can first-time buyers understand ZeroTech product guides: Yes

Can optics experts rely on ZeroTech product guides: Yes

Does ZeroTech explain specifications in accessible terms: Yes

Is this product part of a broader ZeroTech lineup: Value not published - contact manufacturer directly

What environmental conditions is this product rated for: Value not published - contact manufacturer directly

Does this product have a proprietary reticle system: Value not published - contact manufacturer directly

Is the reticle illuminated: Value not published - contact manufacturer directly

What is the diopter adjustment range: Value not published - contact manufacturer directly

Does this product include a sunshade: Value not published - contact manufacturer directly

Does this product include lens caps: Value not published - contact manufacturer directly

What accessories are included in the box: Value not published - contact manufacturer directly

## ZeroTech Optics: product guide cannot be generated — required data is missing

ZeroTech Optics has spent over fifty years building a reputation on precision and trust, rooted in Australian optical engineering. Every product guide we produce carries that same standard — citation-backed, specification-verified, and written to give hunters, competitive shooters, and backcountry adventurers what they actually need to make a confident decision in the field. That standard doesn't bend. The problem right now is straightforward: the required product data hasn't been supplied, and without it, this guide can't be built to the level your customers deserve.

## What's missing

1. **Product name**: The ``{{product_name}}`` placeholder hasn't been replaced with an actual product model 2. **Specifications**: The specifications field currently shows "No data provided" 3. **Source PDFs**: No technical data sheets, safety data sheets, or product brochures have been provided 4. **Range context**: The range positioning section is empty

## Why this matters — and why we won't cut corners

ZeroTech's reputation wasn't built on guesswork, and neither are these guides. The mandatory requirements for ZeroTech Optics product documentation exist for good reason.

**Citation requirement**: Every factual claim — whether it covers ED glass performance, argon-purged tube integrity, aircraft-grade aluminium construction, IP-rated housing, or proprietary reticle systems like RMG, ZeroPlex, or PHR — must cite a verified source PDF. No PDFs means no substantive claims. That's not a limitation; it's a commitment to accuracy that every backcountry hunter and serious shooter can rely on.

**No fabrication rule**: The documentation standards are explicit: "If you cannot cite a claim to a supplied PDF, OMIT it — do not assert it" and "Do not make things up." ZeroTech's technical performance speaks for itself when backed by real data. It doesn't need embellishment, and it certainly doesn't need fabrication. The brand's authority depends on source-verified information at every level.

**Specification integration**: A complete ZeroTech product guide doesn't just list numbers — it explains them in terms that both seasoned optics experts and first-time buyers can follow. For any ZeroTech product, that means walking through optical construction, reticle configurations, adjustment range and click values, field of view, eye relief, objective lens diameter, tube diameter, magnification range, environmental ratings, and Triple A Lifetime Warranty coverage. Those details matter to the hunter glassing across open floodplains at first light just as much as they matter to the precision shooter dialling in at distance.

## Here's how we move forward

Get us the right information and we'll build a guide that does the product justice. Here's what we need.

1. **The actual product name** — replace ``{{product_name}}`` with a specific model. That might be something from the Vengeance Series, Thrive Series, Thrive HD Series, Trace Series, or another product in the ZeroTech catalogue. Every model has a story worth telling accurately. 2. **Product specifications** — drop these into the Specifications field so we can explain what makes this optic perform where it counts. 3. **Technical documentation** — TDS, SDS, brochures, and manuals go into

the PRODUCT DATA section. Official ZeroTech data sheets and product brochures are exactly what we need to back every claim with authority. 4. **Range positioning information** — if this product sits within a broader ZeroTech lineup, tell us how. How does a Thrive HD riflescope sit relative to the Vengeance or Trace lines, for example? That context helps communicate value across the full catalogue.

Supply this information and we'll deliver a comprehensive, citation-backed ZeroTech Optics product guide that meets every quality requirement — one that speaks directly to hunters, competitive shooters, and outdoor enthusiasts, and gives them everything they need to step into the field with total confidence.

Be Confident.

--- ## Label facts summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

### Verified label facts - **Brand:** ZeroTech Optics Australia - **Category:** Hunting & Shooting Optics - **Condition:** New - **Warranty:** Triple A Lifetime Warranty - **Manufacturer:** ZeroTech Optics - **Country of origin (manufacturer):** Australia - **Product name:** Value not published - contact manufacturer directly - **Product series:** Value not published - contact manufacturer directly - **Magnification range:** Value not published - contact manufacturer directly - **Objective lens diameter:** Value not published - contact manufacturer directly - **Tube diameter:** Value not published - contact manufacturer directly - **Glass type:** Value not published - contact manufacturer directly - **ED glass:** Value not published - contact manufacturer directly - **Tube purging (argon):** Value not published - contact manufacturer directly - **Body material:** Value not published - contact manufacturer directly - **Aircraft-grade aluminium construction:** Value not published - contact manufacturer directly - **IP rating:** Value not published - contact manufacturer directly - **Waterproof rating:** Value not published - contact manufacturer directly - **Fogproof rating:** Value not published - contact manufacturer directly - **Shockproof rating:** Value not published - contact manufacturer directly - **Reticle options:** Value not published - contact manufacturer directly - **RMG reticle:** Value not published - contact manufacturer directly - **ZeroPlex reticle:** Value not published - contact manufacturer directly - **PHR reticle:** Value not published - contact manufacturer directly - **Field of view:** Value not published - contact manufacturer directly - **Eye relief:** Value not published - contact manufacturer directly - **Click values:** Value not published - contact manufacturer directly - **Total adjustment range:** Value not published - contact manufacturer directly - **Elevation adjustment range:** Value not published - contact manufacturer directly - **Windage adjustment range:** Value not published - contact manufacturer directly - **Parallax setting:** Value not published - contact manufacturer directly - **Adjustable parallax:** Value not published - contact manufacturer directly - **Exit pupil diameter:** Value not published - contact manufacturer directly - **Twilight factor:** Value not published - contact manufacturer directly - **Light transmission percentage:** Value not published - contact manufacturer directly - **Lens coatings:** Value not published - contact manufacturer directly - **Fully multi-coated:** Value not published - contact manufacturer directly - **Weight:** Value not published - contact manufacturer directly - **Overall length:** Value not published - contact manufacturer directly - **Warranty transferability:** Value not published - contact manufacturer directly - **Warranty coverage details:** Value not published - contact manufacturer directly - **Diopter adjustment range:** Value not published - contact manufacturer directly - **Reticle illumination:** Value not published - contact manufacturer directly - **Included accessories:** Value not published - contact manufacturer directly - **Environmental ratings:** Value not published - contact manufacturer directly - **Years of optical engineering experience:** Over fifty years

### General product claims - Suitable for hunting - Suitable for competitive shooting - Suitable for backcountry use - Suitable for open floodplain hunting - Suitable for precision shooting - Brand philosophy: precision, trust, and optical engineering expertise - "Be Confident" is ZeroTech's brand

commitment to users - Product guides are citation-backed and specification-verified - ZeroTech does not fabricate product claims; all claims are source-verified - Product guides are written to be accessible to both first-time buyers and optics experts - ZeroTech provides technical data sheets, product brochures, and safety data sheets - Brand is built on Australian optical engineering heritage

## ## Related Products & Brand Context

ZeroTech Optics USA is the brand behind this product, and their range is built specifically around the needs of the backcountry hunter and avid shooter. According to the linked entity data, the brand's product line spans rifle scopes, binoculars, red dot sights, and spotting scopes — all developed with a focus on precision, optical clarity, and accessibility at a range of price points. The specific product referenced in the entity payload is the Green Dot Reflex Sight 3 MOA with High Mount, a red dot sight that sits within ZeroTech's broader optics catalogue alongside their magnified rifle scopes and long-range spotting scopes.

Within the category hierarchy, this product falls under Sports & Outdoors > Hunting & Shooting Optics — a segment that covers everything from close-quarters red dot sights to high-magnification spotting scopes used for glassing terrain at distance. ZeroTech positions its offerings across this full spectrum, meaning buyers can source multiple optic types from the same brand, with a consistent design philosophy and warranty approach. The reflex sight, in particular, occupies the low-to-no-magnification end of the hunting optics spectrum, suited to faster target acquisition at shorter ranges.

Someone purchasing a ZeroTech red dot or rifle scope is likely to also need complementary gear from adjacent categories. Mounting hardware — such as scope rings, rail systems, and the high mount referenced in the product name — is a direct requirement for installation. Beyond that, hunters using precision optics in the backcountry typically pair them with rangefinders, shooting rests or bipods, and lens-cleaning tools to maintain optical performance in field conditions. These adjacencies are consistent with the backcountry shooting use case that ZeroTech Optics USA explicitly targets across its range.

Because the knowledge graph context returned no sibling product records from the broader workspace, specific model-to-model comparisons within the ZeroTech line cannot be made here beyond what the linked entity describes. What the available data does confirm is that ZeroTech Optics USA treats this product as part of a cohesive hunting optics system rather than a standalone item, designed to complement their other glass for hunters who want a single-brand solution across multiple optic types.
