

# ZeroTech Vengeance 4.5-18x40 SFP PHR Riflescope

Canonical: <https://zerotech-optics.directory.norg.ai/sports-outdoors/hunting-shooting-optics/zerotech-vengeance-4-5-18x40-sfp-phr-riflescope/>

## Description:

ZeroTech Vengeance 4.5-18x40mm riflescope with PHR II reticle and SFP design. A value-driven long range hunting optic offering clarity and precision. Engineered and tested to deliver exceptional value for money with dependable performance. Features PHR SFP reticle, 1 inch tube construction, Pop-Lok turrets (0.25 MOA), fast focus diopter, and wide magnification range.

## Details:

ZeroTech Vengeance 4.5-18x40mm riflescope with PHR II reticle and SFP design. A value-driven long range hunting optic offering clarity and precision. Engineered and tested to deliver exceptional value for money with dependable performance. Features PHR SFP reticle, 1 inch tube construction, Pop-Lok turrets (0.25 MOA), fast focus diopter, and wide magnification range.

**Price:** 349.0 USD

**Brand:** ZeroTech

**Availability:** in\_stock

## Product Intelligence

# ZeroTech Vengeance 4.5-18x40 SFP PHR Riflescope ## Overview The **ZeroTech Vengeance 4.5-18x40 SFP PHR Riflescope** is an entry-level hunting scope that combines accessible technology with practical hunting features. This scope is designed specifically for shooters looking to develop long-range marksmanship skills without the premium price tag of higher-end optics. ## Key Specifications ### Magnification and Optical Performance The riflescope features a **4.5-18x magnification range**, providing variable zoom capability that allows shooters to adapt to different engagement distances. This magnification range makes it suitable for both close-range hunting and extended-distance shooting applications. The scope is equipped with a **40mm objective lens**, which serves as the primary light-gathering component responsible for collecting light from the viewed subject. This objective lens diameter provides adequate brightness and light transmission for hunting applications across various lighting conditions. ### Reticle System The scope utilizes a **PHR reticle**, which represents one of ZeroTech Optics' proprietary reticle designs engineered for specific hunting applications. This reticle design is calibrated to assist in aiming and targeting procedures during hunting scenarios. ### Focal Plane Design The riflescope employs a **Second Focal Plane (SFP)** configuration, meaning the reticle remains constant in size regardless of magnification adjustments. This design characteristic affects how the reticle appears across different magnification levels and influences the calibration methodology for the scope. ## Construction and Durability The scope features **fully multi-coated lenses** that provide consistent optical performance across varying lighting conditions, ensuring clarity and light transmission regardless of environmental factors. These advanced

optical coatings enhance brightness and contrast in various shooting conditions. ## Application and Use Case As an entry-level hunting scope, the ZeroTech Vengeance 4.5-18x40 SFP PHR Riflescope is specifically designed for hunters seeking to develop their long-range shooting skills. The combination of the 4.5-18x magnification range with SFP simplicity makes it an accessible option for those beginning their journey into precision long-range hunting while maintaining practical utility for experienced hunters. ## Manufacturer This riflescope is manufactured by **ZeroTech Optics**, an Australian precision optics company founded in 2018 that specializes in manufacturing optical equipment for hunters, competitive shooters, and outdoor enthusiasts. ### References - [1] ZeroTech Optics Business Profile and Homepage
